

ORDINANCE NO. 09-2023

**AN ORDINANCE OF THE TOWNSHIP OF EAST HANOVER, COUNTY OF MORRIS,
STATE OF NEW JERSEY, TO ADOPT THE NEW JERSEY DEPARTMENT OF
ENVIRONMENTAL PROTECTION’S MODEL ORDINANCE FOR PRIVATE SALT
STORAGE**

WHEREAS, the New Jersey Department of Environmental Protection (“NJDEP” or the “Department”) has updated the Tier A MS4 Stormwater Regulations; and

WHEREAS, the updated NJDEP regulations require the Township of East Hanover to adopt and enforce an ordinance regulating the proper maintenance of privately owned salt storage facilities;

NOW, THEREFORE, BE IT ORDAINED by the Mayor and Council of the Township of East Hanover, in the County of Morris, State of New Jersey, as follows:

Section 1. Chapter 95, LAND USE AND ZONING of the Code of the Township of East Hanover is hereby amended to include a new ARTICLE XIII – PRIVATELY OWNED SALT STORAGE as follows:

ARTICLE XIII – PRIVATELY-OWNED SALT STORAGE

§ 95-130 - Purpose:

The purpose of this ordinance is to prevent stored salt and other solid de-icing materials from being exposed to stormwater.

This ordinance establishes requirements for the storage of salt and other solid de-icing materials on properties not owned or operated by the municipality (privately-owned), including residences, in the Township of East Hanover to protect the environment, public health, safety and welfare, and to prescribe penalties for failure to comply.

§ 95-131 - Definitions:

For the purpose of this ordinance, the following terms, phrases, words and their derivations shall have the meanings stated herein unless their use in the text of this Chapter clearly demonstrates a different meaning. When consistent with the context, words used in the present tense include the future, words used in the plural number include the singular number, and words used in the singular number include the plural number. The word “shall” is always mandatory and not merely directory.

- A. “De-icing materials” means any granular or solid material such as melting salt or any other granular solid that assists in the melting of snow.

- B. "Impervious surface" means a surface that has been covered with a layer of material so that it is highly resistant to infiltration by water.
- C. "Storm drain inlet" means the point of entry into the storm sewer system.
- D. "Permanent structure" means a permanent building or permanent structure that is anchored to a permanent foundation with an impermeable floor, and that is completely roofed and walled (new structures require a door or other means of sealing the access way from wind driven rainfall).

A fabric frame structure is a permanent structure if it meets the following specifications:

1. Concrete blocks, jersey barriers or other similar material shall be placed around the interior of the structure to protect the side walls during loading and unloading of de-icing materials;
 2. The design shall prevent stormwater run-on and run through, and the fabric cannot leak;
 3. The structure shall be erected on an impermeable slab;
 4. The structure cannot be open sided; and
 5. The structure shall have a roll up door or other means of sealing the access way from wind driven rainfall.
- E. "Person" means any individual, corporation, company, partnership, firm, association, or political subdivision of this State subject to municipal jurisdiction.
 - F. "Resident" means a person who resides on a residential property where de-icing material is stored.

§ 95-132 - Deicing Material Storage Requirements:

- A. Temporary outdoor storage of de-icing materials in accordance with the requirements below is allowed between October 15th and April 15th:
 1. Loose materials shall be placed on a flat, impervious surface in a manner that prevents stormwater run-through;
 2. Loose materials shall be placed at least 50 feet from surface water bodies, storm drain inlets, ditches and/or other stormwater conveyance channels;
 3. Loose materials shall be maintained in a cone-shaped storage pile. If loading or unloading activities alter the cone-shape during daily activities, tracked materials

shall be swept back into the storage pile, and the storage pile shall be reshaped into a cone after use;

4. Loose materials shall be covered as follows:
 - a. The cover shall be waterproof, impermeable, and flexible;
 - b. The cover shall extend to the base of the pile(s);
 - c. The cover shall be free from holes or tears;
 - d. The cover shall be secured and weighed down around the perimeter to prevent removal by wind; and
 - e. Weight shall be placed on the cover(s) in such a way that minimizes the potential of exposure as materials shift and runoff flows down to the base of the pile.
 - (1) Sandbags lashed together with rope or cable and placed uniformly over the flexible cover, or poly-cord nets provide a suitable method. Items that can potentially hold water (e.g., old tires) shall not be used;
5. Containers must be sealed when not in use; and
6. The site shall be free of all de-icing materials between April 16th and October 14th.
 - B. De-icing materials should be stored in a permanent structure if a suitable storage structure is available. For storage of loose de-icing materials in a permanent structure, such storage may be permanent, and thus not restricted to October 15 -April 15.
 - C. All such temporary and/or permanent structures must also comply with all other local ordinances, including building and zoning regulations.
 - D. The property owner, or owner of the de-icing materials if different, shall designate a person(s) responsible for operations at the site where these materials are stored outdoors, and who shall document that weekly inspections are conducted to ensure that the conditions of this ordinance are met. Inspection records shall be kept on site and made available to the municipality upon request.
 1. Residents who operate businesses from their homes that utilize de-icing materials are required to perform weekly inspections.

§ 95-133 - Exemptions:

Residents may store de-icing materials outside in a solid-walled, closed container that

prevents precipitation from entering and exiting the container, and which prevents the de-icing materials from leaking or spilling out. Under these circumstances, weekly inspections are not necessary, but repair or replacement of damaged or inadequate containers shall occur within 2 weeks.

If containerized (in bags or buckets) de-icing materials are stored within a permanent structure, they are not subject to the storage and inspection requirements in Section III above. Piles of de-icing materials are not exempt, even if stored in a permanent structure.

This ordinance does not apply to facilities where the stormwater discharges from de-icing material storage activities are regulated under another NJPDES permit.

§ 95-134 - Enforcement:

This ordinance shall be enforced by the Zoning Officer, Township Engineer or his designee during the course of ordinary enforcement duties.

§ 95-135 - Violations and Penalties:

Any person(s) who is found to be in violation of the provisions of this ordinance shall have 72 hours to complete corrective action. Repeat violations and/or failure to complete corrective action shall result in fines as follows:

Any person, firm or corporation who shall violate any of the provisions of this chapter shall, upon conviction, be punished by a fine not to exceed \$500 for each offense or by imprisonment for a term not to exceed 90 days, or a requirement of community service not to exceed 90 days. A separate offense shall be deemed committed on the day on which a violation occurs and each day the violation continues to occur.

The Mayor and Council of the Township of East Hanover may authorize the Township of East Hanover to take such action as deemed necessary to remedy said violation and condition, and the cost of said remedy, together with any other charges incurred, shall be a principal lien against the real property upon which said costs and charges were incurred in the same manner of real property taxes, such costs to include the manpower cost per hour of Township employees required to complete said remedies as certified by the Superintendent of Public Works, direct cost for materials, and costs of any third-party contractor.

§ 95-136 - Severability:

Each section, subsection, sentence, clause, and phrase of this Ordinance is declared to be an independent section, subsection, sentence, clause, and phrase, and finding or holding of any such portion of this Ordinance to be unconstitutional, void, or ineffective for any cause or reason shall not affect any other portion of this Ordinance.

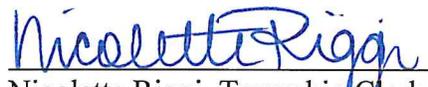

Section 2. This Ordinance shall be a part of the Code of the Township of East Hanover as though codified and fully set forth therein. The Township Clerk shall have this ordinance codified and incorporated in the official copies of the Code. The Township Clerk and the Township Attorney are authorized and directed to

change any Chapter, Article and/or Section number of the Code of the Township of East Hanover in the event that the codification of this Ordinance reveals that there is a conflict between the numbers and the existing Code, and in order to avoid confusion and possible accidental repealers of existing provisions not intended to be repealed.

Section 3. This Ordinance shall take effect upon final publication as provided by law.

ATTEST:

TOWNSHIP OF EAST HANOVER

Nicolette Riggi, Township Clerk

Joseph Pannullo, Mayor

Introduced: November 6, 2023
Adopted: December 4, 2023

I, Nicolette Riggi, Township Clerk of the Township of East Hanover, County of Morris, hereby certify the foregoing to be a true copy of an Ordinance adopted by the Township Council at a duly convened meeting held on December 04, 2023.

Nicolette Riggi, Township Clerk
